ENERGY TRANSFER ANNOUNCES MARINER EAST 2 PIPELINE IS IN SERVICE

Mariner East 2 Pipeline is Now Transporting Natural Gas Liquids from Eastern Ohio to the Marcus Hook Industrial Complex

DALLAS – December 29, 2018 – Energy Transfer LP (NYSE: ET) announced that effective today its Mariner East 2 natural gas liquids (NGLs) pipeline is in service, available for both interstate and intrastate service. The 350-mile NGL pipeline transports domestically produced ethane, propane and butane east from processing plants in Ohio across West Virginia and Pennsylvania to Energy Transfer’s Marcus Hook Industrial Complex in Delaware County, PA, where the NGLs are stored for distribution to local, domestic and waterborne markets.

Mariner East 2 is part of Energy Transfer’s Mariner East system of pipelines designed to provide much-needed NGL takeaway capacity for the Marcellus and Utica Shale production areas in Eastern Ohio, West Virginia and Western Pennsylvania. The Mariner East 2X pipeline, which parallels Mariner East 2, is expected to be in service in late 2019. The Mariner East system will provide both operational flexibility and enhanced security of NGL supply from producing areas to key markets in the region and beyond.

According to a 2015 economic impact study by EConsult Solutions, the total impact from the construction of the Mariner East pipelines is estimated to be more than $9.1 billion in Pennsylvania alone. When complete, the projects will have provided more than 9,500 construction jobs per year for six years, with associated earnings totaling more than $2.7 billion.

About the Partnerships

Energy Transfer LP (NYSE: ET) owns and operates one of the largest and most diversified portfolios of energy assets in the United States, with a strategic footprint in all of the major domestic production basins. ET is a publicly traded limited partnership with core operations that include complementary natural gas midstream, intrastate and interstate transportation and storage assets; crude oil, natural gas liquids (NGL) and refined product transportation and terminalling assets; NGL fractionation; and various acquisition and marketing assets.
